The GD20 is a beautiful dreadnought-style acoustic guitar with a special combination of tonewoods that offers a new take on this classic body style.

For players looking for a different sound, the GD20 combines a solid cedar top with mahogany back and sides to produce a warm, detailed tone that works beautifully for a wide range of musical styles. The slim satin-finish mahogany neck and 12"-radius rosewood fingerboard provide great feel and playability, while the split-saddle design of the pin-less rosewood bridge provides superior intonation for sweeter-sounding chords and single-note runs.

Other great features include a synthetic bone nut and bridge saddle, rosewood headcap, pearloid dot inlays, chrome die-cast tuners and an elegant Natural satin finish.
